Automated OS patching for cloud resources

Detect, assess, test and execute patches more efficiently.

Easily maintain regular patching schedule

Get built-in patching logging, reporting, alarms

Reduce manual patching efforts and downtime

Install updates with confidence and efficiency

Patching for AWS

Protect and enhance your resources by keeping them up to date with Logicworks Patching for AWS. Logicworks Patching for AWS detects, assesses, tests and executes OS level patches.

Patching for AWS is available to all 24x7 Cloud Operations customers.

Step 1: Scan and monitor for security updates

Step 2: Determine severity of updates and accept or exclude

Step 3: Test patches on lower level systems

Step 4: Install updates with confidence and efficiency
